PLATE IV.

THE SKELETON OF AN INFANT.

The nomenclature of this figure is the same as that of the foregoing, excepting:—

F. Anterior Fontanelle.

24. Center of Ossification of Manubrium.

Centers of Ossification of Gladiolus.

26. Cartilaginous Ensiform Appendix.

32. Unossified Carpus.

52. Unossified Tarsus.

The Os Frontis (Fig. 5) consists

of two lateral halves.

ξ. Tuberosities of the Tibia.
 ψ. External Malleolus.
 ω. Internal Malleolus.

The Superior and Inferior Maxillaries (Figs. 9 and 13) lack the alveoli.

The bodies of the Vertebræ (B) are all of a size, the Spine being about as large in the Cervical as in the Lumbar region.

The Transverse Processes (m) are hardly developed. The Spinous Processes are absent altogether, and the whole Vertebral column consists of two lateral halves (o).

PLATE V.

FIGS. I TO VIII. DEVELOPMENT OF THE FŒTAL SKULL.

Fig. 1. At the beginning of Second month.

Fig. 11. End of same.

Fig. 111. First half of Third month.

Fig. IV. Second half of same.

Fig. v. At end of Fourth.

Fig. vi. At end of Fifth.

Fig. vII. At end of Seventh.

Fig viii. At end of Ninth month.

I. Sphenoid Bone.

II. Occipital Bone.

a. Occipital Portion.

b. Condyloid Portion.

c. Basilar Portion.

III. Temporal Bone.

a. Squamous Portion.

b. Mastoid Portion.

IV. Parietal Bone.

v. Frontal Bone

a. Frontal Portion.

b. Orbital Portion.

c. Nasal Portion.

vi. Ethmoid Bone.

VII. Lachrymal Bone.

VII. Superior Maxillary Bone.

IX. Malar Bone.

x. Palate Bone.

xi. Nasal Bone.

XII. Inferior Maxillary Bone.

A. Anterior Fontanelle.

B. Posterior Fontanelle.

C. Posterior Temporal Fontanelle.

D. Anterior Temporal Fontanelle.

20. Tympanic Bone.

AD. FIG. VIII.

9. External Occipital Protuber-

10. External Occipital Spine.

12. Zygomatic Process of Temporal.

23. Anterior Superior Angle of Parietal.

24. Posterior Superior Angle of same.

25. Posterior Inferior Angle of same.

26. Anterior Inferior Angle of same. | 79. Angle of Lower Jaw.

32. Superciliary Ridge.

36. Malar or External Angular Process.

63. Frontal Process of Malar.

69. Body of Inferior Maxillary.

70. Ramus of Lower Jaw.

75. Sigmoid Notch.

76. Condyloid Process.

77. Neck of same.

78. Coronoid Process.

FIG. IX. ADULT SKULL-SIDE VIEW.

1. Parietal Bone.

2. Frontal.

3. Occipital.

4. Lambdoid Suture.

5. Coronal Suture.

6. Nasal Eminence.

7. Nasal Bones.

8. Anterior Nares.

9. Anterior Nasal Spine.

10. Upper Teeth.

11. Lower Teeth.

12. Chin.

[Jaw.

13. Lower Border of Body of the

14. Angle of Lower Jaw

15. Posterior Border of Ramus.

16. Supraorbital Foramen.

17. 17. Temporal Ridge.

18. Squamous Portion of Temporal.

19. Squamous Suture.

20. Anterior Inferior Angle of Par-

21. Zygomatic Surface of Sphenoid.

- 22. External Angular Process of Frontal.
- 23. Malar Bone
- 24. Lachrymal Bone.
- 25. Orbital Surface of Sphenoid.
- 26. Orbital Surface of Upper Maxillary.
- 27. Infraorbital Foramen.

- 28. Zygomatic Process of Temporal.
- 29. Sigmoid Notch.
- 30. Condyle of Lower Jaw.
- 31. Coronoid Process of Lower Jaw.
- 32. Styloid Process of Temporal.
- 33. Mastoid Process.
- 34. Occipital Groove.
- 35. Masto-occipital Suture.

PLATE VI.

FIGS. I TO XX. MICROSCOPIC STRUCTURE OF THE BONE.

(FIG I. LONGITUDINAL SECTION OF ULNA. FIG. II. TRANSVERSE SECTION OF SAME.

- a. Cartilaginous Base.
- b. Haversian Canals.
- c. Their Lamellæ.

- d. Canaliculi.
- e. Bone Corpuscles.

FIG. III. TRANSVERSE SECTION OF COSTAL CARTILAGE.

- a. Intercellular Substance.
- b. Cartilage Cells.

c. Cells containing Nuclei.

FIG. IV. SECTION OF CARTILAGE OF EAR. a. Cartilage Cells.

| b. Fibrous Intercellular Substance.

FIG. V. SECTION OF INTERVERTEBRAL SUBSTANCE.

a. Cartilage Cells.

b. Fibrous Intercellular Substance.

FIG. VI. TRANSVERSE SECTION OF BONE.

a. b. Osteoblasts.

c. Opening of Haversian Canal.

FIG. VII. BONE FORMATION.

a. b. Osteoblasts in different stages | a. Mononucleated. of formation.

b. Polynucleated.

FIG. VIII. LONGITUDNAL SECTION.

Position of Osteoblasts around a vessel in the process of ossification.

FIG. IX. SECTION OF LONG BONE.

- 1. Marrow Cavity.
- 2. Periosteum.
- 3. Compact Tissue.
- 4. Epiphysis.

- 5. Diaphysis.
- 6. 8. Articular Surfaces showing Articular Cartilage.
- 7. Diaphyso-epiphysal Line.

FIG. X. SECTION OF CERVICAL VERTEBRA.

a. Outer Compact Tissue. b. Spongy Tissue. c. Inner Compact Tissue.

FIG. XI. SECTION OF LONG BONES, SHOWING COURSE OF NUTRIENT VESSELS.

1. Nutrient Vessel.

2. Descending Branch.

3. Compact Tissue.

4. Medullary Cavity.

FIG. XII. SECTION OF CRANIAL BONE.

a. External Table.

b. Diploe.

c. Inner or Vitreous Table.

FIG. XIII. FŒTAL PELVIS-SIDE VIEW.

1. Sacrum and Coccyx.

2. Ilium.

3. Ischium.

4 Pubes.

5. Acetabulum.

6. Obturator Foramen.

7. Antero-posterior Diameter.

8. Pelvic Axis.

FIG. XIV. SAME-FRONT VIEW.

1. Sacrum.

2. Coccyx.

3. Ilium.

4. Sacro-sciatic Notch.

5. Pubes.

6. Ischium.

7. Ilio-pectineal Line.

8. Acetabulum.

FIG. XV. OS INNOMINATUM, SEPARATED INTO ITS THREE DIVISIONS.

1. Ilium.

2. Ischium.

3. Pubes.

FIG. XVI. FŒTAL STERNUM-ANTERIOR SURFACE.

1. Manubrium.

2. Second | Intercostal Spaces.

4. Fourth Intercostal Space.

5. Costal Cartilage of Seventh Rib.

6. Ensiform Appendage.

FIG. XVII. FŒTAL THORAX—FRONT VIEW.

FIG. XVIII. SAME—SIDE VIEW.

1. First Rib.

2, 3. Thoracic Line.

4, 4. Dorsal Vertebræ.

FIG. XIX. FŒTAL SACRUM AND COCCYX.

FIG. XX. FŒTAL RIB-SUPERIOR ASPECT.

1. Head.

2. Tubercle.

3. Shaft. Angle.

4. Sternal Extremity.

PLATE VII. FIGS. I TO X.

FIG. I. INFERIOR MAXILLARY BONE—OUTER ASPECT.

1. Symphysis.

2. Mental Process.

3. 3. External Oblique Ridge.

4. Mental Foramen.

- 5. Inferior Border of Body.
- 6. Angle.
- 7. Coronoid Process.
- 8. Sigmoid Notch.
- 9. Condyle.
- 10. Neck.

- 11. Inferior Dental Foramen.
- 12. Sockets of Lateral Incisors.
- 13. Sockets of Canines.
- 14. Sockets of Bicuspids.
- 15, 16, 17. Sockets of three Molars.

FIG II. SAME BONE-INNER SURFACE.

- 1. Symphysis.
- 2. Genial Tubercles.
- 3. Depression for Digastricus.
- 4. Sublingual Fossa.
- 5. Mylo-hyoidean Ridge.
- 6. Lower Border of Body.
- 7. Angle.

- 8. Alveolar Process:
- 9. Inferior Dental Foramen.
- 10. Condyle.
- 11. Neck.
- 12. Sigmoid Notch.
- 13. Coronoid Process.
- 14. Posterior Border of Ramus.

FIG. III. SAME BONE—INFERIOR DENTAL CANAL, AND ROOTS OF THE TEETH EXPOSED.

- 1. Condyle.
- 2. Coronoid Process.
- 3. Sigmoid Notch.

- 4, 5. Inferior Dental Vessels and Nerves.
- 6, 6. Their distribution to the fangs of the Teeth.

FIG. IV. FŒTAL INFERIOR MAXILLARY, SHOWING THE DENTAL SACS OR TEETH GERMS.

- a. Alveolar Border.
- b. Lower Border of Jaw.
- c. Symphysis and Dental Sacs.
- d. Coronoid Process.

FIG. V. SAME BONE, SHOWING MILK TEETH.

- 1. Condyloid Process.
- 2. Coronoid Process.
- 3. Incisors.
- 4. Canine.

- 5. First Milk Molar.
- 6. Second Milk Molar.
- 7. Alveoli of Permanent Teeth.

FIG. VI. SAME BONE OF A FŒTUS-SUPERIOR ASPECT.

- 1. Symphysis.
- 2, 2, 2, 2, 2. Sockets for teeth.
- 3. Coronoid Process.

- 4. Sigmoid Notch.
- 5. Condyle. [Canal.
- 6. Opening of Inferior Dental

FIG. VII. SAME BONE, FŒTAL, BEFORE THE APPEARANCE OF THE ALVEOLAR PROCESS.

- 1. Symphysis.
- 2. Lower Border of Jaw.
- 3. Angle.
- 4. Posterior Border of Ramus.
- 5. Condyle.
- 6. Sigmoid Notch.
- 7. Coronoid Process.
- 8. Alveolar Border.

FIG. VIM. UPPER AND LOWER JAWS IN POSITION, SHOWING THEIR MODES OF ARTICULATION, AND POSITION OF TEETH.

- 1. Superior Border of Nasal Bone.
- 2. Superior Border of Nasal Pro-
- 3. Frontal Bone. cess.
- 4. Margin of Spheno-maxillary Fissure.
- 5. Nasal Bone.
- [lary. 6. Nasal Process of Upper Maxil-
- 7. Infraorbital Foramen.
- 8. Anterior Nares.
- 9. Anterior Nasal Spine.
- 10. Malar Bone.

- 11. Frontal Process of same.
- 12. Zygomatic Process.
- 13. Condyle of Lower Jaw.
- 14. Sigmoid Notch.
- 15. Posterior Border of Ramus.
- 16. Lower Border of Body.
- 17. Symphysis.
- 18, 19. Incisors.
- 20. Canine.
- 21, 22. Bicuspids.
- 23, 24, 25. Molars.

FIG. IX. UPPER JAW-INFERIOR ASPECT.

- 1. Nasal Process.
- 2. Anterior Nasal Spine.
- 3. Infraorbital Foramen.
- 4. Malar Bone.
- 5. Zygomatic Process.
- 6. Anterior Palatine Foramen.
- 7. Hard Palate.
- 8. Horizontal Plate of Palate Bone.

- 9. Posterior Nasal Spine.
- 10, 11. Incisors.
- 12. Canine.
- 13, 14. Bicuspids.
- 15, 16, 17. Molars.
- 18. Posterior Dental Foramen.
- 19. Hamular Process.

FIG. X. MALAR BONE-ORBITAL PROCESS, SUPERIOR SURFACE.

- 1. Superior Angle.
- 2. Anterior Angle.
- 3. Anterior Superior Border.
- 4. Orbital Surface.

- 5. Superior Maxillary Border.
- 6. Border of Spheno-maxillary Fissure.
- 7. Sphenoidal Surface.

PLATE VIII.

LEFT PALATE BONE—EXTERNAL ASPECT.

- 1. Rough surface for Superior Maxillary.
- 2. Its Anterior Border.
- 3. Smooth Zygomatic Surface.
- 4. Sphenoid Process.
- 5. Orbital Process.

- 6. External facet of Zygomatic Sur-
 - 7. Spheno-palatine Notch.
- 8. Posterior Palatine Canal.
- 9. Tuberosity.
- 10. Posterior border joining Internal Pterygoid Plate.

FIG. II. SAME BONE-INTERNAL SURFACE.

- 1. Sphenoidal Surface of Orbital Process. cess.
- | 3. Sphenoidal Process.
 - 4. Spheno-palatine Notch.
- 2. Ethmoidal Surface of same Pro | 5. Superior Turbinated Crest.

- 6. Middle Meatus.
- 7. Inferior Turbinated Crest.
- S. Inferior Meatus.
- 9. Tuberosity.

- 10. Internal Border of Horizontal Plate.
- 11. Anterior portion of Vertical Plate.

FIG. III. SAME BONE-ANTERIOR BORDER.

- 1. Ethmoidal Surface of Orbital Process.
- 2. Maxillary Surface of same.
- 3. Spheno-palatine Notch.
- 4. Sphenoidal Process.

- 5, 6. Internal Surface. [Plate.
- 7. Upper Surface of Horizontal
- 8. Internal Border of same.
- 9. Tuberosity. [Portion.
- 10. External Surface of Vertical

FIG. IV. SAME BONE-POSTERIOR BORDER.

- 1. Sphenoidal Surface of Orbital Process.
- 2. Orbital Surface of same.
- 3. Zygomatic Surface of same.
- 4. Sphenoidal Process.
- 5. Spheno-palatine Notch.
- 6. Internal Surface of Vertical Plate.
- 7. Superior Surface of Horizontal Plate.

- 8. Internal Border of same.
- 9. Articular Groove for Internal Pterygoid Plate.
- 10. Groove for Internal Pterygoid Muscle.
- 11. Groove for External Pterygoid Plate.
- 12. External Portion of Vertical Plate.

FIG. V. SAME BONE-SUPERIOR ASPECT.

- 1. Orbital Process.
- 2. Sphenoidal Process.
- 3. Spheno-palatine Notch.
- 4. Posterior Border of Vertical Plate.
- 5. Superior Surface of Horizontal Plate.
- 6. Its Posterior Border.
- 7. Its Internal Border.
- 8. Its Anterior Border.
- 9. Anterior Spine of Vertical Plate.
- 10. Posterior Nasal Spine.

FIG. VI. SAME BONE-INFERIOR ASPECT.

- 1. Inferior Surface of Horizontal
- 2. Its Posterior Border. Plate.
- 3. Its Anterior Border.
- 4. Its Internal Border.
- 5. Orbital Process.

- 6. Sphenoidal Process.
- 7. Posterior Palatine Canal.
- 8. Accessory Palatine Canal.
- 9. Tuberosity.
- 10. Posterior Nasal Spine.

FIG. VII. SAME BONE-MATURE FŒTUS-INTERNAL SURFACE.

- 1. Sphenoidal Process.
- 2. Orbital Process.
- 3. Spheno-palatine Foramen.
- 4. Tuberosity.

- 5. Anterior Border of Vertical Plate.
- 6. Internal Border of Horizontal Plate.

FIG. VIII. LEFT INFERIOR TURBINATED BONE-INTERNAL SURFACE.

- 1. Superior Maxillary Border.
- 2. Lachrymal Process.
- 3. Ethmoidal Process.
- 4. Palatine Border.

- 5. Inferior Free Border.
- 6. Anterior Fxtremity.
- 7. Posterior Extremity.

FIG IX. SAME BONE-OUTER SURFACE.

- 1. Maxillary Border.
- 2. Lachrymal Process.
- 3. Ethmoidal Process. [Antrum.]
- 4. Portion Covering the orifice of the 8. Inferior Border.
- 5. Palatine Border.
- 6. Posterior Extremity.
- 7. Anterior Extremity.

FIG. X. VOMER—RIGHT SIDE.

- 1. Superior Border.
- 2. Posterior Border.
- 3. Anterior Border.

- 4. Inferior Border.
- 5. Anterior Extremity.

FIG. XI. VOMER-SUPERIOR AND ANTERIOR BORDERS.

- 1. Groove and Alæ for Rostrum.
- 2. Groove of Anterior Border.
- 3. Anterior Extremity.
- FIG. XII. RIGHT NASAL BONE-EXTERNAL SURFACE.
- 1. Superior Border.
- 3. External Border.

2. Inferior Border.

4. Internal Border.

SAME BONE-INNER ASPECT. FIG. XIII.

- 1. Superior Border.
- 2. Inferior Border.
- 3. External Border.

- 4. Internal Surface.
- 5. Internal Border.

FŒTAL VOMER. FIG. XIV.

- 1. Anterior Border.
- 2. Inferior Border.

- 3. Posterior Border.
- 4. Superior Border.

FIG. XV. ETHMOID—SUPERIOR SURFACE.

- 1. Crista Galli.
- 2. Cribriform Plate.
- 3. Slit for Nasal Nerve.
- 4. Anterior Ethmoidal Foramen.
- 5. Posterior Ethmoidal Foramen.
- 6. Infundibulum. [Frontal.
- 7, 7. Part of Lateral Mass joining | 12. Perpendicular Plate.
- 8. Os Planum.
- 9. Plate and Cells covered by Nasal Process of Upper Maxillary.
- 10. Posterior part of Lateral Mass.
- 11. Posterior Border of Cribriform Plate.

FIG. XVI. SAME BONE-INFERIOR SURFACE.

- 1. Vertical Plate.
- 2, 2. Grooves between Lateral Masses and Vertical Plate.
- 3. Middle Turbinated Bone.
- 4. Inferior Orifice of Infundibulum.
- 5. Maxillary Process.

- 6. Palate Process.
- 7. Posterior Portion of Lateral Masses.
- 8. Plates and Cells covered by Nasal Process.
- 9. Posterior part of Middle Turbinal.

FIG. XVII. SAME BONE-ANTERIOR SURFACE.

- 1. Crista Galli.
- 2. Eminences on the same.
- 3. Vertical Plate.
- 4. Groove between it and Lateral Masses.
- 5. Lateral Masses and Orifice of Infundibulum.
- 6. Plate and Cells joining the
- 7. Os Planum. [Lachrymal.
- 8. Inferior Border of Same.
- 9. Plates joining the Middle Turbinal.
- 10. Anterior Border of Lateral Masses.

FIG. XVIII. SAME BONE-POSTERIOR SURFACE.

- 1. Crista Galli.
- 2. Its eminences.
- Masses. 3. Vertical Plate.
- 4. Groove between it and Lateral
- 5. Posterior part of Lateral Mass.
- 6. Posterior Extremity of Superior Meatus.
- 7. Posterior Extremity of Middle Turbinal.
- 8. Posterior Ethmoidal Cells.

FIG. XIX. SAME BONE-LEFT SIDE VIEW.

- 1. Crista Galli.
- 2. Its eminences.
- 3. Anterior Ethmoidal Cell.
- 4. Os Planum.
- 5. Superior Border of Os Planum.
- 6. Its Inferior Border.
- 7. Portion of same Border joining Palate.
- 8. Posterior Border of Os Planum.

- 9. Its Anterior Border.
- 10. Infundibulum.
- 11. Anterior Ethmoidal Cells.
- 12. Inferior Border of Vertical Plate.
- 13. Its Posterior Border.
- 14. Middle Turbinated Bone.
- 15. Its Posterior Extremity.
- 16. Superior Meatus.

FIG. XX. SAME BONE-LONGITUDINAL SECTION-LEFT SIDE VIEW.

- 1. Crista Galli.
- 2. Its eminences.
- 3. Perpendicular Plate.
- 4. Its Anterior Border.
- 5. Its Inferior Border joining Cartilage of Septum.
- 6. Articular Surface for Vomer.

- 7. Posterior Border.
- 8. Slit for Nasal Nerve.
- 9. Inferior Orifices of Olfactory Foramina.
- 10. Middle Turbinated Bone.
- 11. Superior Meatus.
- 12. Posterior part of Left Lateral

FIG. XXI. SAME BONE—LONGITUDINAL SECTION—RIGHT SIDE.

- rior Ethmoidal Cells and Middle Turbinal.
- 1, 1. Bristles passed through Ante- | 2, 2. Bristles passed into Posterior Ethmoidal Cells through the Superior Meatus.

- 3. Posterior Ethmoidal Foramen.
- 4. Plate in front of Superior Turbinal.
- 5. Anterior Ethmoidal Foramen.
- 6. Olfactory orifices of Cribriform Plate.
- 7. Superior Turbinated.
- 8. Superior Meatus.
- 9. Middle Turbinated.
- 10. Its Posterior Extremity. [Mass.
- 11. Posterior part of Right Lateral
- 12, 13. Plates of Anterior Cells.

SAME BONE-LEFT SIDE-OS PLANUM REMOVED TO SHOW ANTERIOR AND POSTERIOR CELLS.

- 1. Crista Galli.
- 2. Its eminences.
- 3, 3, 3. Anterior Ethmoidal Cells.
- 4, 4, 4. Posterior Ethmoidal Cells.
- 5. Septum separating Anterior and Posterior Cells.
- 6. Anterior extremity of Middle Turbinal.
- 7. Inferior Border of same.
- 8. Superior Meatus.
- 9. Plate of Anterior Cells.
- 10. Plate of Posterior Cells.

FIG. XXIII. FŒTAL INFERIOR TURBINATED BONE-ANTERIOR ASPECT.

- Border. Surface.
- 2. Anterior Extremity and Internal | 4. Concave External Surface.
- 1. Process projecting from Superior | 3. Process projecting downwards from Superior Border.

PLATE IX. FIGS. I TO V.

FIG. I. FRONTAL BONE-OUTER SURFACE.

- 1. Remains of Frontal Suture.
- 2. Nasal Eminence.
- 3. Nasal Notch.
- 4. Nasal Spine.
- 5. Frontal Eminence.
- 6. Superciliary Ridge.

- 7. Orbital Arch.
- 8. Supra-orbital Notch or Foramen.
- 9. Internal Angular Process.
- 10. External Angular Process.
- 11. Temporal Ridge.
- 12. Superior Border.

FRONTAL BONE-INNER SURFACE.

- 1. Groove for superior longitudinal [Ethmoid.
- 2. Frontal crest, for articulation with
- 3. Foramen Cæcum.
- 4. Nasal Spine.
- 5. Openings of Frontal Sinuses.
- 6. Anterior Fossa of Skull.
- 7. Cerebral Surface of the Orbital Plates.
- 8. Expanded base of the Nasal Spine.
- 9. External Angular Process.
- 10. Orbital Arch.
- 11. Surface articulating with the Great Wing of the Sphenoid.
- 12. Inferior Border.
- 13. Superior Border.

FIG. III. FRONTAL BONE-HORIZONTAL PORTION-EXTERNAL SURFACE.

- 1. Median line.
- 2. Frontal Eminence.
- 3. Openings of Frontal Sinuses.
- 4. Superior Border seen through Ethmoidal Notch.
- 5. Frontal Eminence.

- 6. Superciliary Ridge.
- 7. Orbital Arch.
- 8. Superior part of the Orbit.
- 9. Orbital Plate.
- 10. Internal Angular Process.
- 11. External Angular Process.
- 12. Inferior Border divided by the Ethmoidal Notch.
- 13. Surface articulating with Great Wing of Sphenoid.
- 14. Ethmoidal Cells.
- 15. Lachrymal Fossa.
- 16. Ethmoidal Notch.

FIG. IV. FRONTAL BONE-ANTERIOR SURFACE. ANTERIOR TABLE RE-MOVED TO SHOW THE CAVITIES, SEPTUM, AND INFERIOR OPENINGS OF THE FRONTAL SINUSES.

- 1. Median Line of the bone.
- 2. Frontal Sinuses, their openings communicating with the Nasal Fossæ, and their prolongations backward to the level of the orbital region.
- 3 Septum.

- 4. Nasal Notch.
- 5. Nasal Spine.
- 6. Internal Angular Process.
- 7. External Angular Process.
- 8. Orbital arch and Supra-orbital Foramen.
- 9. Temporal Ridge.

FIG. V. FRONTAL BONES AT BIRTH-DEVELOPED BY TWO LATERAL HALVES-NATURAL SIZE.

PLATE X. FIGS. I TO VI.

RIGHT PARIETAL BONE-EXTERNAL SURFACE-NATURAL SIZE.

- 1. Parietal Eminence.
- 2. Temporal Ridge.
- 3. Parietal Foramen.
- 4. Superior or Parietal Border.
- 5. Inferior or Temporal Border.
- 6. Anterior or Frontal Border.
- 7. Posterior or Occipital Border.
- 8. Anterior Superior Angle.
- 9. Anterior Inferior Angle.
- 10. Posterior Inferior Angle.
- 11. Posterior Superior Angle.

PARIETAL BONE-INTERNAL OR CEREBRAL SURFACE.

- 1. Parietal Fossa.
- [tery. 2. Groove for Middle Meningeal Ar-
- 3. Grooves for its branches.
- 4. Parietal Foramen. Sinus.
- 5. Groove for Superior Longitudinal
- 6. Groove for Lateral Sinus.
- 7. Superior Border.

- 8. Inferior Border.
- 9. Anterior Border.
- 10. Posterior Border.
- 11. Anterior Superior Angle.
- 12. Anterior Inferior Angle.
- 13. Posterior Superior Angle.
- 14. Posterior Inferior Angle.

OCCIPITAL BONE-OUTER SURFACE-NATURAL SIZE.

- 1. Smooth Surface for Occipito-Frontalis.
- 3. External Occipital Crest.
- 4. Foramen Magnum.
- 2. External Occipital Protuberance. | 5. Basilar Process—Inferior Angle.

- 6. Superior Curved Line.
- 7. Rough surface for Muscular Attachment.
- 8. Inferior Curved Line.
- 9. Same as No. 7.
- 10. Posterior Condyloid Fossa.
- 11. Posterior Condyloid Foramen-

(not constant.)

- 12, 12. Condyles.
- 13. Superior Border.
- 14. Lateral Angle.
- 15. Inferior Border.
- 16. Jugular Process.
- 17. Superior Angle.

FIG. IV. OCCIPITAL BONE-INTERNAL SURFACE.

- 1. Groove for Superior Longitudinal Sinus.
- 2. Internal Occipital Protuberance.
- 3. Internal Occipital Crest.
- 4. Foramen Magnum.
- 5. Basilar Process; anterior surface articulating with body of Sphenoid.
- 6. Superior Occipital Fossa, for Cerebrum. [side.
- 7. Groove for Lateral Sinus of left
- 8. Groove for Lateral Sinus of right side. [bellum.
- 9. Inferior Occipital Fossa, for Cere-

- 10. Groove for Lateral Sinus.
- 11. Jugular Process.
- 12. Groove for Petrosal Sinus.
- 13. Fossa and Anterior Condyloid Foramen.
- 14. Condyle.
- 15. Posterior Condyloid Foramen.
- 16. Superior Border.
- 17. Inferior Border.
- 18. Superior Angle.
- 19. Lateral Angle.
- 20. Borders of the Basilar process articulating with petrous portion of Temporal Bone.

FIGS. V AND VI. FCETAL PARIETAL AND OCCIPITAL.

PLATE XI.

FIGS. I TO VII. SPHENOID BONE.

FIG. I. SPHENOID-SUPERIOR SURFACE.

- 1. Grooves for Olfactory Nerves.
- 2. Optic Groove.
- 3, 3. Optic Foramen.
- 4. Superior Surface of Lesser Wing.
- 5. Apex of same.
- 6. Anterior Clinoid Process.
- 7. Border of Ala Minor.
- 8. Pituitary Fossa.
- 9. Support of Posterior Clinoid Process.
- 10. Posterior Clinoid Process.
- 11. Basilar Groove.
- 12. Sphenoidal Fissure.
- 13. Superior Surface of Ala Major.

- 14. Cavernous Groove.
- 15. Foramen Rotundum.
- 16. Foramen Ovale.
- 17. Foramen Spinosum.
- 18. Posterior surface of body for Occipital.
- 19. Posterior surface of body for Petrous.
- 20. Spine of Sphenoid.
- 21. Posterior Border of Alæ Majores.
- 22. Triangular surface joining the Frontal.
- 23. Articular surface for Parietal.
- 24. Ethmoidal Spine.

SAME BONE-INFERIOR SURFACE.

- 1, 2. Rostrum.
- 3. Sphenoidal Sinuses.
- 4. Ethmoidal Spine.
- 5. Sphenoidal Turbinated Bone.
- 6. Base of Pterygoid Process.
- 7. Internal Pterygoid Plate.
- 8. External Pterygoid Plate.
- 9. Posterior Surface of Body.
- 10. Inferior Surface of Lesser Wing.
- 11. Sphenoidal Fissure.
- 12. Articular Surface of Lesser Wings for Frontal.
- 13. Orbital Surface of Great Wing.

- 14. Border of Spheno-maxillary Fissure.
- 15. Articular Border for Malar Bone.
- 16. Temporal Surface of Great Wing.
- 17. Zygomatic Surface of Great Wing.
- 18. Foramen Ovale.
- 19. Foramen Spinosum.
- 20. Posterior Border of Great Wing.
- 21. Tip of Ala Major.
- 22. Sphenoidal Spine.
- 23. Foramen Rotundum.

FIG. III. SAME BONE-ANTERIOR SURFACE.

- 1. Support for Posterior Clinoid Process.
- 2. Olfactory Groove.
- 3, 4. Rostrum.
- 5, 5. Sphenoidal Sinuses.
- 6. Articular Border for Ethmoid.
- 7. Anterior Border of Lesser Wing.
- 8. Inferior Surface of same.
- 9. Sphenoidal Fissure.
- 10. Foramen Rotundum.
- 11. Orbital Surface of Great Wing.

- 12. Articular Surface for Malar Bone.
- 13. Margin of Sphenoidal Fissure.
- 14. Sphenoidal Zygomatic Surface. 15. Sphenoid portion of Temporal
- Fossa.
- 16. Articular Border for Frontal.
- 17. Apex of Great Wing.
- 18. Foramen Spinosum and Spine.
- 19. Foramen Ovale.
- 20. External Pterygoid Plate.
- 21. Internal Pterygoid Plate.
- 22. Vidian Canal.

SAME BONE-POSTERIOR SURFACE.

- 1. Support for Posterior Cliniod Process.
- 2. Posterior Clinoid Process.
- 3. Basilar Groove. [ital.
- 4. Posterior Surface—joins Occip-
- 5. Pterygo-palatine Fissure.
- 6. Rostrum.
- 7. Vidian Canal. [Bone.

- 9. Anterior Clinoid Process.
- 10. Posterior Border of Lesser Wing.
- 11. Internal Pterygoid Plate.
- 12. External Pterygoid Plate.
- 13. Pterygoid Fossa.
- 14. Extremity of Great Wing.
- 15. Anterior Border of Great Wing.
- 16. Posterior Border of same.
- 8. Posterior Border joining Petrous | 17. Articular Surface for Malar.

SAME BONE-SUPERIOR SURFACE. THE UPPER PLATE REMOVED. EXPOSING THE SPHENOIDAL SINUSES AND THEIR SEPTUM.

- 1. Superior Surface.
- 2. Sphenoidal Sinuses.
- 3. Orifices of same.
- 4. Support for Posterior Clinoid Process.
- 5. Posterior Clinoid Process.
- 6. Anterior Clinoid Process.
- 7. Optic Foramen.
- 8. Superior Surface of Lesser Wings.

- 9. Sphenoidal Fissure.
- 10. Anterior Border of Alæ Minores.
- 11. Articular Border of Ala Major for Frontal.
- 12. Extremity of Great Wing.
- 13. Posterior Border of Great Wing.
- 14. Superior Surface of Great Wing.
- 15. Cavernous Groove.

- 16. Foramen Rotundum.
- 17. Foramen Ovale.
- 18. Foramen Spinosum.
- 19. Sphenoidal Spine.
- 20. Posterior Surface of Body.
- 21. Posterior Surface of Support of Posterior Clinoid Processes.

FIG. VI. SAME BONE-MATURE FŒTUS-UPPER ASPECT.

- 1. Posterior Portion of Body.
- 2. Lesser Wings.

- 3. Great Wings.
- 4. Root of Great Wings.

FIG. VII. SAME BONE-POSTERIOR SURFACE.

- 1. Posterior Surface of Body.
- 2. Inferior Surface of Body.
- 3. Pterygoid Processes.

- 4. Lesser Wings.
- 5. Great Wings.

FIG. VIII. SAME BONE-INFERIOR SURFACE.

- 1. Anterior Portion of Body.
- 2. Lesser Wings.
- 3. Posterior Portion of Body.
- 4. Cavity found on the Inferior surface of the Fetal Sphenoid.
- 5. Sphenoidal Fissure.
- 6. Great Wings.
- 7. Pterygoid Process.
- 8. Root of Great Wing.

PLATE XII. FIGS. I TO XIII.

FIG. I. TEMPORAL BONE—EXTERNAL SURFACE.

- 1. Squamous Portion.
- 2. Zygomatic Process.
- 3. Articular Surface for Malar.
- 4. Base of Zygomatic Process.
- 5. Anterior Root.
- 6. Middle Root.
- 7. Posterior Root.
- 8. Posterior Margin of Glenoid Fossa.
- 9. Auditory Process.
- 10. Anterior Portion of Glenoid Fossa.
- 11. Posterior Portion of same.
- 12. Petrous Portion of Temporal.

- 13. Superior Orifice of Carotid
- 14. Base of Styloid Process. [Canal.
- 15. Styloid Process.
- 16. Mastoid Process.
- 17. Mastoid Groove.
- 18. Mastoid Foramen.
- 19. Superior Border.
- 20. Surface for Articulation with Great Wing of Sphenoid.
- 21. Notch between Petrous and Squamous Portions.
- 22. Groove between Squamous and Mastoid Portions.
- 23. Inferior Border.

FIG. II. TEMPORAL BONE-INTERNAL SURFACE.

- 1. Squamous Portion, Inner Surface.
- 2. Groove for lodgment of Branch of Middle Meningeal Artery.

- 3. Superior Surface of Petrous Portion.
- 4. Hiatus Fallopii. [tion.
- 5. Posterior Surface of Petrous Por-
- 6. Orifice of Aquæductus Vestibuli.
- 7. Meatus Auditorius Internus.
- 8. Superior Border of Petrous Portion.
- 9. Apex of Petrous Portion.
- 10. Surface articulating with Jugular Process of Occipital.
- 11. Inferior Border of Petrous Por-
- 12. Styloid Process.

- 14. Internal Orifice of Mastoid Foramen.
- 15. Superior Border of Bone.

13. Groove for Lateral Sinus.

- 16. Surface articulating with the Great Wing of Sphenoid.
- 17. Articular Surface of Zygomatic Process for the Malar Bone.
- 18. Groove between Squamous and Petrous Portions.
- 19. Groove between the Squamous and Mastoid Portions.
- [tion. 20. Articular Surface for Occipital.

FIG. III. TEMPORAL BONE-INFERIOR SURFACE.

- 1. Zygomatic Process. [Bone.
- 2. Articular Surface for Malar
- 3. Base of Zygomatic Process.
- 4. Anterior Root.
- 5. Superior division of Middle Root.
- 6. Inferior division of Middle Root.
- 7. Anterior Portion of Glenoid Cavity.
- 8. Posterior Portion of Glenoid Cavity.
- 9. Glaserian Fissure.
- 10. Inferior Orifice of Carotid Canal.
- 11. Jugular Fossa.
- 12. Triangular Surface for articulating with the Jugular Portion of Occipital.

- 13. Groove for Lateral Sinus.
- 14. Vaginal Process.
- 15. Meatus Auditorius Externus.
- 16. Stylo-mastoid Foramen.
- 17. Apex of Mastoid Process.
- 18. Groove for Digastric Muscle.
- 19. Mastoid Foramen.
- 20. Aquæductus Cochlæ, Orifice of.
- 21. Superior Orifice of Carotid Canal.
- 22. Angle between Squamous and Petrous Portions.
- 23. Anterior Border of Squamous Portion.
- 24. External Surface of Squamous Portion.

FIG. IV. TEMPORAL BONE OF A MATURE FŒTUS-EXTERNAL SURFACE.

- 1. Squamous Portion.
- 2. Zygomatic Process.
- 3. Superior Division of Middle Root.
- 4. Inferior Division of Middle Root.
- 5. Glenoid Cavity (very shallow).
- 6. Angle between the Squamous and Petrous Portions.
- 7. Articular Surface for Malar Bone.
- 8. Bony Ring at Meatus Auditorius Externus.
- 9. Stylo-mastoid Foramen.
- 10. Mastoid Portion. [tion.
- 11. Inferior Border of Mastoid Por-
- 12. Rudiments of Mastoid Process.

FIG. V. RIGHT SUPERIOR MAXILLARY BONE-EXTERNAL SURFACE.

- 1. Apex of Nasal Process articulating with Frontal.
- 2. Anterior Border of Nasal Process articulating with Nasal Bone.

- 3. Inner Margin of Posterior Border articulating with Os Unguis.
- 4. External Margin of Posterior Border.
- 5. Orbital Surface.
- 6. Infra-orbital Groove.
- 7. Anterior Portion of Border of Orbital Surface articulating with Lachrymal Bone.
- 8. Middle Portion of same joining the Ethmoid.

- 9. Posterior Portion of same Border joining the Palate Bone.
- 10. Malar Process.
- 11. Infra-orbital Foramen.
- 12. Incisive Fossa.
- 13. Ridge extending from Malar Process to the Alveolar Border.
- 14. Maxillary Tuberosity.
- 15. Nasal Border.
- 16. Anterior Nasal Spine.
- 17. Alveolar Border.

FIG. VI. SAME BONE-INTERNAL SURFACE.

- 1. Apex of Nasal Process.
- 2. Anterior Border of same. [der.
- 3. Internal Margin of Posterior Bor-
- 4. Superior Turbinated Crest.
- 5. Middle Meatus.
- 6. Inferior Turbinated Crest.
- 7. Nasal Notch.
- 8. Nasal Spine.
- 9. Palate Process.
- 10. Anterior Palatine Canal.
- 11. Hard Palate forming the Floor of the Nose.

- 12. Inferior Meatus.
- 13. Antrum of Highmore.
- 14. Portion of Antrum closed by Palate Bone.
- 15. Surface joining the Vertical Portion of Palate.
- 16. Posterior Palatine Canal.
- 17. Articular Surface for the Tuberosity of Palate.
- 18. Alveolar Process.
- 19. Maxillary Tuberosity.

FIG. VII. SAME BONE-SUPERIOR SURFACE.

- 1. Apex of Nasal Process.

 - 2. Cœliac Axis.
 - 3. Inferior Phrenic.
 - 4. Left Phrenic.
 - 5. Branch to the Diaphragm.
 - 6. Supra-renal Artery—Left Side.
- 7. Œsophageal Branch.
- 8. Anterior Branches of Phrenic.
- 9. Right Phrenic. [phragm.
- 10. Branches to the Crura of Dia-

- 11. Supra-renal Artery—Right Side.
- 12. Ramifications of the Phrenic Arteries.
- 13. Branches to Vena Cava.
- 14. Gastric.
- 15. Hepatic.
- 16. Splenic.
- 17. Superior Mesenteric.
- 18. Supra-renal Branch.
- 19. Renal.
- 20. Spermatic.
- 21. Inferior Mesenteric.
- 22. Colica Sinistra.
- 23. Sigmoid.
- 24. Superior Hemorrhoidal.
- 25, 26, 27. Lumbar Arteries.

- 28. Sacra Media.
- 29. Fifth Lumbar Artery.
- 30. Iliac Artery.
- 31. Internal Iliac.
- 32. External Iliac.
- 33. Posterior Trunk of Internal Iliac.
- 34. Lateral Sacral.
- 35. Obturator.
- 36. Sciatic.
- 37. Right Epigastric.
- 38. Left Epigastric.
- 39. Spermatic Branch.
- 40. Distribution to Abdominal Muscles.
- 41. Circumflex Iliac.
- 42. Anastomoses with Ilio-lumbar.

PLATES XXI AND XXII.

ARTERIES OF THE STOMACH.

- a. Crura of the Diaphragm.
- b. Œsophagus.
- c. Cardiac End of Stomach.
- d. Pyloric End of Stomach.
- e. Pyloric Valve.
- f. Duodenum.
- g. Pancreas.
- h. Spleen.i. Hilus.
- k. Liver.
- l. Round Ligament of Liver.
- m. Suspensory Ligament.
- n. Gall Bladder.
- o. Its Cervix.
- p. Ductus Communis Choledochus.
- q. Vena Portæ.
- 1. Abdominal Aorta.
- 2. Cœliac Axis.
- 3. Phrenic.
- 4. Gastric.
- 5. Œsophageal Branch.
- 6. Its Anastomosis with 7.

- 7. The Pyloric Branch.
- 8. Hepatic Artery.
- 9. Gastro-Duodenalis.
- 10. Pancreatic Branch.
- 11. Pancreatico-duodenalis.
- 12. Gastro-epiploica Dextra.
- 13. Pyloric Branch.14. Gastric Branches.
- 15. Branches to the Omentum.
- 16. Hepatic Artery.
- 17. Cystic.
- 18. Splenic.
- 19. Pancreatic Branches.
- 20. Gastro-Epiploica Sinistra.
- 21. Its Inosculation with 12.
- 22. Vasa Brevia.
- 23. Splenic Branches.
- 24. Superior Mesenteric.
- 25. Inferior Pancreatico-duodenalis.
- 26. Anastomosis of 25 with 11.
- 27. Inferior Mesenteric.

FIG. II.

- a. Diaphragm.
- b. Liver.

- c. Right Lobe.
- d. Left Lobe.

- e. Lobus Spigelii.
- f. Lobus Quadratus.
- g. Hepatic Duct.
- h. Gall Bladder.
- i. Cystic Duct.
- k. Ductus Communis Choledochus.
- l. Vena Portæ.
- m. Œsophagus.
- n. Stomach.
- o. Œsophageal Opening.
- p. Cardiac End of Stomach.
- q. Pyloric End of Stomach.
- r. Pylorus.
- s. Duodenum.
- t. Spleen.
- 1. Abdominal Aorta.
- 2. Inferior Phrenic.
- 3. Cœliac Axis.
- 4. Its Division.

- 5. Gastric Artery.
- 6. Œsophageal Branch.
- 7. Gastric.
- 8. Branches to Cardiac End of Stomach.
- 9. Hepatic Artery.
- 10. Gastro-duodenalis.
- 11. Gastro-epiploica Dextra.
- 12. Duodenal Branch.
- 13. Gastric Branches.
- 14. Branches to Omentum.
- 15. Pyloric Branch.
- 16. Pyloric Artery.
- 17. Hepatic Artery.
- 18, 19, 20. Division of Hepatic Arteries before entering the liver.
- 21. Cystic Artery.
- 22. Splenic Artery.
- 23. Gastro-epiploica Sinistra.

PLATES XXIII AND XXIV.

INTESTINAL ARTERIES.

- a. Pancreas.
- b. Duodenum.
- c. Jejunum and Ileum.
- d. Ascending Colon.
- e. Transverse Colon.
- f. Descending Colon.
- g. Sigmoid Flexure.
- h. Rectum.
- i. Transverse Mesocolon.
- k. Descending Mesocolon.
- l. Crest of Ilium.
- m. Anterior Superior Spine of Ilium.
- 1. Superior Mesenteric Artery.
- 2. Inferior Pancreatico-duodenalis.
- 3. Superier Pancreatico-duodenalis.

- 4. Colica Media.
- 5. Anastomoses with Colica Dextra.
- 6. Anastomoses with Colica Sinis-
- 7. Vasa Intestini Tenuis.
- 8. Abdominal Aorta.
- 9. Left Renal Artery.
- 10. Spermatic Artery.
- 11. Lumbar Arteries.
- 12. Iliac Arteries.
- 13. Inferior Mesenteric.
- 14. Colica Sinistra.
- 15. Ascending Branch.
- 16. Descending Branch.
- 17, 19. Superior Hemorrhoidal.
- 18. Sigmoid.

PLATES XXV AND XXVI.

SUPERIOR MESENTERIC ARTERY.

- a. Pancreas.
- b. Duodenum.
- c. Jejunum and Ileum.
- d. Ileo-cæcal Valve...

- e. Cæcum.
- f. Vermiform Appendix.
- g. Ascending Colon.
- h. Hepatic Flexure.

- i. Transverse Colon.
- k. Splenic Flexure.
- l. Descending Colon.
- m. Anterior Muscular Band of Colon.
- n. Mesentery.
- 1 to 6. Same as preceding plates.
- 7. Ileo-colic.
- 8. Colica Dextra.
- 9. Ileo-colic.

- 10. Cæcal Branches.
- 11. Branch to Vermiform Appendix.
- 12. Ileac Branch of Ileo-colic.
- 13. Anastomoses with Intestini Tenuis.
- 14. Vasa Intestini Tenuis.
- 15, 16, 17. Arches formed by Anastomoses of 14.
- 18. Intestinal Branches.

PLATES XXVII AND XXVIII.

PELVIC ARTERIES IN THE MALE.

Muscles.

- a. Lumbar Vertebræ.
- b. Sacrum.
- c. Coccyx.
- d. Symphysis Pubis.
- e. Longissimus Dorsi
- f. Gluteus Magnus
- g. Transversalis
- h. Rectus
- i. Iliacus

- 6. Internal Iliac.
- 7. Posterior Trunk.
- 8. Ilio-lumbar.

- 9. Iliac Branch.
- 10. Psoas, or Lumbar Branch.
- 11. Anastomosis with Circumflex Ilii.
- 12. Lateral Sacral.
- 13. Branch to Levator Ani.
- 14. Obturator Artery.
- 15. Branch to Obturator Internus.
- 16. Anastomosis with 38.
- 17. Gluteal Artery.
- 18. Anterior Trunk of Internal Iliac.
- 19. Superior Vesical.
- 20. Obliterated Hypogastric Artery.
- 21. Middle Vesical.
- 22. Inferior Vesical.
- 23. Branch to Vesicula Seminales.
- 24. Internal Pudic.
- 25. Middle Hemorrhoidal.
- 26. Branch to Levator Ani.
- 27. Branch to Vesicula Seminales.
- 28. Branches to Rectum.
- 29. Sciatic Artery.
- 30. Branch to Pyriformis.
- 31. External Iliac.
- 32. Circumflex Iliac.
- 33. Branches to Iliacus.
- 34. Branches to Transversalis.
- 35. Anastomosis with Ilio-lumbar.
- 36. Epigastric.
- 37. Obturator Branch.
- 38. Anastomosis of 37, with 16 and 9.
- 39. Cremasteric Branch.

PLATES XXIX AND XXX.

PELVIC BRANCHES IN THE FEMALE.

Muscles.

- a. Lumbar Vertebræ.
- b. Sacrum.
- c. Coccyx.
- d. Symphysis Pubis.
- e. Horizontal Ramus of Pubes.
- f. Longissimus Dorsi
- g. Gluteus Maximus
- h. Transversalis
- i. Internal Inguinal Ring.
- k. Psoas Magnus
- l. Iliacus
- m. Obturator Internus > Muscles.
- n. Pyriformis
- o. Levator Ani
- p, q, r, s, t, u. Same as preceding plates.
- v. Vagina.
- w. Uterus.
- x. Round Ligament of Uterus.
- y. Fallopian Tube.
- z. Fimbriated Extremity.
- a. Ovary.
- b. Rectum.
- 1. Abdominal Aorta.
- 2. Inferior Mesenteric Artery.
- 3. Left Common Iliac.
- 4. Lumbar.
- 5. Middle Sacral.

- 6. Last Lumbar Artery.
- 7. Right Iliac.
- 8. Internal Iliac.
- 9. Lateral Sacral.
- 10. Ilio-lumbar.
- 11. Lumbar Branch.
- 12. Obturator.
- 13. Branch to Obturator Internus.
- 14. Anastomosis with Epigastric.
- 15. Gluteal Artery.
- 16. Superior Vesical.
- 17. Obliterated Hypogastric Artery.
- 18. Vesical Arteries.
- 19. Uterine Arteries.
- 20. Vaginal Branches.
- 21. Uterine Branch.
- 22. Internal Pudic.
- 23. Middle Hemorrhoidal.
- 24. Branch to Levator Ani.
- 25. Sciatic Artery.
- 26. Sacral Branch.
- 27. Right External Iliac.
- 28. Circumflex Iliac.
- 29. Iliac Branch.
- 30. Anastomosis with Ilio-lumbar.
- 31. Epigastric.
- 32. Pubic Branch.
- 33. Muscular Branch.

PLALES XXXI AND XXXII.

ARTERIES OF THE THIGH. ANTERIOR ASPECT.

- a, b. External Oblique.
- c. Rectus Abdominis.
- d. Sheath of Rectus.
- e. Pyramidalis.

- 3. Temporal Lobes.
- 4. Gray Substance of Convolutions.
- 5. White Substance of Brain.
- 6. Crura Cerebri.
- 7. Thalamus Opticus.
- 8. Corpus Callosum.

- 9. Fornix.
- 10. Lateral Ventricle.
- 11. Corpus Striatum.
- 12. Nucleus Lenticularis.
- 13. Nucleus Teniaformis.
- 14. Hippocampus Major. [tricte.
- 15. Inferior Cornu of Lateral Ven-

FIG. II. UPPER ASPECT OF CEREBELLUM.

- 1. Crura Cerebri.
- 2. Locus Niger.
- 3. Testes.
- 4. Nates.
- 5, 9. Superior Vermiform Process.
- 6. Lobus Centralis.
- 7. Monticulus Cerebelli.

- 8. Commissura Simplex.
- 9. Transverse Lamina.
- 10, 12. Hemispheres of Cerebellum
- 10. Lobus Quadratus.
- 11. Lobus Semilunaris Superior.
- 12. Lobus Semilunaris Inferior

FIG. III. DIRECTION OF FIBRES IN THE CEREBELLUM.

- 1. Crura Cerebri.
- 2. Nates.
- 3. Laqueus.
- 4. Velum Medullare Anterius.
- 5. Lingula.

- 6. Fifth Cranial Nerve.
- 7. Deep Fibres of Pons Varolii.
- 8. Superficial Fibres of Pons.
- 9. Deep Branches to Hemispheres.

FIG. IV. SAME AS FIG. III.

FIG. V. FIBRES OF PEDUNCLES OF THE CEREBELLUM AND PONS VAROLII.

1. Crura Cerebelli.

- 2. Its Fibres which pass to the
- 3. Various Lobes of the Cerebellum

FIG. VI.

- 1. Medulla Oblongata.
- 2. Pyramid.
- 3. Fasciculus Arciformis.
- 4. Olive.
- 5. Restiform Body.
- 6. Crura Cerebelli.
- 7, 8. (Arbor Vitæ formed by
- 9. Crura Cerebri et Cerebelli.
- 10. Fibres passing to Cerebellum.
- 11. Portion lying under Corpora Quadrigemina.
- 12. Horizontal Fibres.
- 13. Pyramids.

- 14. Continuation of 6 through the Pons.
- 15. Superficial Fibres of Pons Varolii.
- 16. Deep Fibres of Pons.
- 17. Olivary Fasciculus.
- 18. Fasciculus Teres.
- 19. (Anterior Fibres of
- 20. Crura Cerebri.
- 21. Corpora Albicantia.
- 22. Nates.
- 23. Brachia.
- 24. Testes.

FIG. VII. NERVE SUBSTANCE.

- a. Cranial Nerve, after death.
- b. Cellular Substance of Brain.
- c. Peripheral Nerve, modified by death.
- d. Nerve Fibre during life.
- 1. Its covering.
- 2. White substance of Schwann.

FIG. VIII. GANGLIONIC CELLS FROM THE SEMILUNAR GANGLION OF THE FIFTH CRANIAL NERVE.

- a. Nerve Fibre.
- b. Round Ganglionic Cells.
- c. Oval Ganglionic Cells.
- 1. Granular Substance.

- 2. Nucleus.
- 3. Nucleolus.
- d. Position of Ganglionic Cells.

FIG. IX. ORIGIN OF THE OLFACTORY NERVE.

- 1. Frontal Lobe.
- 2. Convolution of the Longitudinal Fissure.
- 3. Optic Commissure.
 - 4. Optie Tract.
 - | 5. Optic Nerve.

- 6. Anterior Perforated Space.
- 7. Internal Root of Olfactory Nerve.
- 8. Long Root of Same.
- 9. Gray or Middle Root.
- 10. Gray Nucleus Forming Origin of—
- 11. Olfactory Nerve.
- 12. Its Bulb.

FIG. X. OPTIC COMMISSURE.

- a. Anterior View.
- b. Posterior View.
- 1. Optic Tract.

- 2. Commissure.
- 3, 4. Optic Nerves.

FIG. XI. ORIGIN OF THE OPTIC NERVE.

- 1. Corpus Callosum.
- 2. Tapetum.
- 3. Hippocampus Major.
- 4. Tænia Semi circularis.
- 5. Posterior Crus of the Fornix.
- 6. Body of the Fornix.
- 7. Anterior Crus of the Fornix.
- 8. Corpora Albicantia.

- 9. Thalamus Opticus.
- 10. Corpus Geniculatum Externum.
- 11. Optic Tract.
- 12. Optic Commissure.
- 13. Optic Nerve.
- 14. Retina.
- 15, 16. Fibres passing from one Eye to the other.

FIG. XII. NERVES OF THE EYE.

- a. Frontal Bone.
- b. Frontal Sinus.
- c. Ethmoid Bone.
- d. Sella Turcica.
- e. Malar Bone.
- f. Lachrymal Gland.
- g. Upper Eyelids.
- h. Superior Oblique Muscle.
- i. Its Pulley.
- k. Its Tendon.
- l. Levator Palpebræ Muscle.
- m. Rectus Superior Muscle.
- n. Inferior Rectus Muscle.
- o. External Rectus Muscle.
- p. Sphenoidal Sinus.
- q. Internal Carotid Artery.
- r. Eyeball.

- 1. Optic Nerve.
- 2. Motor Oculi.
- 3. Branch to Rectus Superior.
- 4. Branch to Internal and Inferior Recti.
- 5. Trochlearis Nerve.
- 6. Trifacial Nerve.
- 7. Casserian Ganglion.
- 8. (Ophthalmic Division of the
- 9. Fifth Nerve.
- 10. Nasal Nerve.
- 11. Lachrymal Nerve.
- 12. Superior Maxillary Division.
- 13. Abducens Nerve.
- 14. Ophthalmic Ganglion.
- 15. Ciliary Nerve.
- 16. Ciliary Branch of Nasal Nerve.

PLATES VII AND VIII.

FIG. I. A SECTION OF THE SPINAL CORD, INCLUDING THE LOWER END OF THE CERVICAL AND UPPER END OF THE DORSAL

PORTIONS. ANTERIOR ASPECT.

- 1. Dura Mater.
- 2. Ligamentum Dentatum.
- 3. Spinal Cord.

- 4. Cervical enlargement of Cord.
- 5. Anterior Median Fissure.
- 6. Anterior Column.

- 7. Lateral Column.
- 8. Posterior Column.
- 9. Spinal Canal.

- 10. Anterior Roots of Spinal Nerves.
- 11. Posterior Roots of same.
- 12. Spinal Nerves.

FIG. II. LOWER PORTION OF THE SPINAL CORD.

- 1. Spinal Marrow.
- 2. Cauda Equina.
- 3. Filum Terminale.
- 4. Anterior Roots of Spinal Nerves.
- 5. Posterior Roots.
- 6. Their Union.
- 7. Dura Mater.

FIG. III. TRANSVERSE SECTION OF THE MEDULLA OBLONGATA ABOVE THE ORIGIN OF THE FIRST CERVICAL NERVES; ENLARGED.

- 1. Anterior Median Fissure.
- 2. Posterior Median Fissure.
- 3. Spinal Canal.
- 4. Anterior Pyramids.
- 5. Lateral Tracts.
- 6. Posterior Pyramids.
- 7. Anterior Horn of Gray Matter.
- 8. Posterior Horn of Gray Matter.
- 9. Gelatinous Substance.
- 10. Anterior Roots of Spinal Nerves.
- 11. Posterior Roots of same.
- 12. Origin of Nervus Accessorius Willisii.
- 13. Gray Commissure.

FIG. IV. TRANSVERSE SECTION OF SPINAL CORD.

- 1. Anterior Median Fissure.
- 2. Posterior Median Fissure.
- 3. Spinal Canal.
- 4. Commissura Anularis.
- 5. Anterior Gray Commissure.
- 6. Posterior Gray Commissure.
- 7. Anterior Horn of Gray Matter.
 - 8. Posterior Horn of Gray Matter.
 - 9. White Substance of Cord.
- 10. Posterior Roots of Spinal Nerves.
- 11. Anterior Roots of same.

FIG. V. TRANSVERSE SECTION OF MEDULLA OBLONGATA AND SPINAL CORD.

- a. Section of Nates.
- 1, 2, 3. Crura Cerebri.
- 4. Locus Niger.
- 5. Posterior Perforated Space.
- 6. Aquæduetus Sylvii.
- 7. Gray Matter.
- 8. Testes.
- 9, 10. White Matter.
- b. Section of Testes.
- 1. Pons Varolii.
- 2. Locus Niger.
- 3. Tegmentum.
- 4. Fasciculi Teretes.
- 5. Aquæduct of Sylvius.
- 6. Nates.
- 7. White Substance.

- 8. Gray Nucleus. [the Pons Varolii.
- c. Section of Medulla Oblongata at
- 1. Anterior Pyramids.
- 2. Anterior Median Fissure.
- 3, 4. Olivary Body.
- 5. Restiform Body.
- 6. Gray Substance.
- 7. Eminentiæ Teretes.
- 8. Fourth Ventricle.
- d. Section of Middle Medulla.
- 1-3. Same as previous figure.
- 4. Corpus Dentatum.
- 5, 8. Same as preceding figure.
- e. Transverse section of Medulla Oblongata behind the Fourth Ventricle.

- 1. Anterior Median Fissure.
- 2. Posterior Median Fissure.
- 3. Anterior Pyramids.
- 4. Olivary Fasciculi.
- 5. Restiform Bodies.
- 6. Canal of Medulla Oblongata.
- 7. Gray Center.
- 8. Anterior Gray Bodies.
- 9. Posterior Gray Bodies.
- f. Section of Medulla Oblongata. Figures same as in preceding.

- q, o. Section of Spinal Cord from Cervical Portion to Filum Terminale.
- 1. Anterior Median Fissure.
- 2. Posterior Median Fissure.
- 3. Anterior Column.
- 4. Lateral Column.
- 5. Posterior Column.
- 6. Gray Substance.
- 7. Anterior Horn.
- 8. Posterior Horn.

FIG. VI. DISTRIBUTION OF NERVE FIBRES TO THE MUSCLES.

- 1. Voluntary Muscular Fibre.
- 2. Nerve.

3. Distribution of Nerve Fibrils in Loops.

FIG. VII.

- a. Pacinian Corpuscles on the 1. Nerve Branchlets. Palmar Surface of the Hand.
- 1. Nerve Branchlet.
- 2. Pacinian Corpuscles.
- 3. The Terminal ends of the Nerves.
- b, c. Pacinian Corpuscles Magnified.
- 2. Central Portion.
- 3. Concentric Envelopes.
- 4. Processes penetrating the surrounding Tissues.

FIG. VIII. ORIGIN OF THE TRIGEMINUS NERVE.

- 1. Crura Cerebri.
- 2. Corpora Quadrigemina.
- 3. Laqueus.
- 4. Crura Cerebelli.
- 5. Fourth Ventricle.
- 6. Calamus Scriptorius.
- 7. Gray Wings.
- 8. Crura Cerebri et Cerebelli.
- 9. Crus ad Medullam Oblongatum.
- 10. Posterior Portion of Medulla.
- 11. Trifacial Nerve.

- 12. Ophthalmic Nerve.
- 13. Superior Maxillary Nerve.
- 14. Inferior Maxillary Nerve.
- 15. Casserian Ganglion.
- 16. Sensory Root of Fifth Nerve.
- 17. Motor Root of Fifth Nerve.
- 18. Course of Nerve.
- 19. Auditory Nerve.
- 20. Facial Nerve.
- 21. Pneumogastric Nerve.

FIG. IX. FIFTH NERVE AND CASSERIAN GANGLION; INFERIOR ASPECT.

FIG. X. BRANCHES OF THE SECOND and THIRD DIVISIONS OF THE FIFTH NERVE.

- a. Frontal Bone.
- b. Frontal Sinus.
- c. Occipital Bone.
- d. Parietal Bone.

- e. Mastoid Portion of Temporal Bone.
- f. Mastoid Process.
- g. Fallopian Tube.

- h. Petrous Portion of Temporal Bone.
- i. Tympanum.
- k. Ossicula Auditus.
- l. Orbit.
- m. Antrum of Highmore.
- n. Lower Jaw.
- o. Rectus Capitis Posticus Major Muscle.
- p. Obliquus Inferior Muscle.
- q. Spinalis Cervicis Muscle.
- r. Levator Anguli Scapulæ Muscle.
- s. Rectus Capitis Anticus Muscle.
- t. Tensor Palati Muscle.
- u. Superior Pharyngeal Constrictor v. Middle Muscles.
- w. Inferior
- x. Stylo-pharyngeus Muscle.
- y. Levator Anguli Oris Muscle.
- z. Orbicularis Oris Muscle.
- a. Tongue.
- β . Genio-glossus Muscle.
- 7. Sublingual Gland.

- 35. Branch to Ophthalmic Division of 4.

36. Branch to Superior Maxillary | 53. Branch from Sympathetic to 51. Division.

37. Branch to Inferior Maxillary Division.

38. Branch from 5 to Otic Ganglion.

39. Internal Pterygoid Nerve.

40. Small Petrosal Nerve.

41. Branch from 73 to 44.

42. Buccal Nerve.

43. Facial Nerve.

44. Chorda Tympani.

45. Branch joining 44 to 28.

46. Meckel's Ganglion.

47. Branch from Maxillary Ganglion to Sympathetic.

48. Branches to Submaxillary Gland.

49. Branches to Stapedius Muscle.

50. Glosso-pharyngeus Nerve.

51. Petrosal Ganglion. [to 51.

52. Branch from Jugular Ganglion

54. Jacobson's Nerve.

55. Branch to Foramen Rotundum.

56. Branch to Foramen Ovale.

57. Branch from 54 to Sympathetic.

58. Tympanic Branch.

59. Pharyngeal Nerve.

60. Pharyngeal Branches.

61. Pneumogastric Nerve.

62. Jugular Ganglion. 63. Hypoglossal Nerve.

64. Nervus Accessorius Willisii.

65. Sympathetic Nerve.

66. Inferior Carotid Ganglion.

67. Superior Cervical Ganglion.

68. Nervi Molles.

69. Vertebral Nerve.

70. Branch from 65 to 62.

71. Branch from 62 to 54 and 43.

72. Branch from 64 to 65.

73. Otic Ganglion.

FIG. IV.

a. Frontal Bone.

b. Ethmoid Bone.

c. Ethmoidal Foramen.

d. Lachrymal Bone. e. Fossa Lachrymalis.

f. Maxillary Process of Malar Bone.

g. Superior Maxillary Bone.

h. Alveolar Process.

- r. Fleshy Portion of the Tongue.
- 1. Glosso-pharyngeus Nerve.
- 2. Anastomosing Branch with 3.
- 3. Digastric Branch Communicating with the Facial Nerve.
- 4. Pharyngeal Branch Communicating with Pharyngeal Branch of Pneumogastric.
- 5, 6. Carotid Branches.
- 7, 8. Origin of 5 and 6.
- Communicating Branch with Sympathetic Filaments from the Superior Cervical Ganglion.
- 10. Anastomosing Carotid Branches.
- 11. Branch to Superior Thyroid Artery.
- 12. Anastomosing Branch to Superficial Cardiac Nerve.
- 13, 14, 15. Pharyngeal Branches.
- 16. Larger Branch of Glosso-pharyngeus Giving Origin to
- 17. The Branch to the Stylo-pharyngeus Muscle Proper.
- 18. Smaller or External Lingual Branch.
- 19. Occasional Branch of 18.
- 20. Tonsillar Branch.
- 21, 22. Lateral Lingual Branch.
- 23. Glosso-pharyngeal Branches to Superior Constrictor and Epiglottis.
- 24. Deep Lingual Branches of 1.
- 25. Spinal Accessory.
- 26. External Branch of 25.
- 27. Internal Branch of 25.
- 28. Anastomosis of Branches of 27 and the Pneumogastric Nerve.
- 29. Pharyngeal Branch of Pneumo-
- 30. Pharyngeal Plexus. [gastric. 31–33. Ascending Branches of 30 to Superior Constrictor.

- 34. Branches of 30 Passing with 1.
- 35. Branches of 30 to Middle Constrictor.
- 36. Descending Branches of 30.
- 37-40. Descending Branches to Inferior Constrictor.
- 41. Descending Branch of 30 which joins the External Laryngeal and the Intercostal Nerve.
- 42. Internal Laryngeal Branch of Pneumogastric Nerve.
- 43. Anastomosis of 42 and 1.
- 44. Anastomosis of 42 with Nervi Molles.
- 45. Pneumogastric Nerve, Ganglioniform Enlargement.
- 46. Superior Cervical Ganglion.
- 47. Nervi Molles from 46 to Superior Intercostal Nerve.
- 48. Carotid Branches of 46.
- 49. Nervi Molles from Superior Cervical Ganglion to 44.
- 50. External Laryngeal Nerve.
- 51, 52. Branches of 50 to Middle and Inferior Constrictors.
- 53. Branch of 50 to the Interior of Larynx.
- 54. Anastomosis of Internal and External Laryngeal Nerves.
- 55. Branches of External Laryngeal to the Pharynx, Larynx and Thyroid Gland.
- 56. Nervi Molles passing from the Inferior Portion of the Superior Cervical Ganglion.
- 57. Anastomosis of Nervi Molles and External Laryngeal Nerve.
- 58. Nervus Mollis from the Superficial Cardiac Nerve.
- 59,60. Nervi Mollesto Thyroid Gland. 82. Inferior Facial Branch.

- 61. Ninth Cerebral Nerve.
- 62. Anastomosis Between the First and Second Cervical Spinal Nerves.
- 63. Anastomosis of 61 with First Cervical.
- 64. Two Filaments which pass from the First Cervical Spinal to the Superior Cervical Ganglion.
- 65. Branches of Second Cervical Nerve to the Superior Cervical Ganglion.
- 66. Branch to Superior Cervical Ganglion from Anastomosis of Second and Third Cervical Nerves.
- 67. Anastomosis of Second and Third Cervical Spinal Nerves.
- 68. Branch of Second Cervical Nerve to the Descendens Noni.
- 69. Third Cervical Spinal Nerve.
- 70. Branch of 69 to Descendens Noni.
- 71. Fourth Cervical Spinal Nerve.
- 72. Fifth Cervical Spinal Nerve.
- 73. Phrenic Nerve.
- 74. Portio Dura.
- 75. Digastric Branch of 74.
- 76. Stylo-hyoid Branch of 74.
- 77. Filaments of 76 which join Temporal Sympathetic Branches.
- 78. Auricular Branch of Inferior Maxillary Division of Fifth Nerve Anastomosing with 74.
- 79. Temporal Branch of 74.
- 80. Superior Facial Branch.
- 81. Middle Facial Branch.

- 7. Ascending Branches. [lion.
- 8. Descending Branches.
- 9. Tracheal Branches.
- 10. Pharyngeal Branches to Constrictors.
- 11. Branches to Thyroid Gland and Larynx.
- 12. Branch to Internal Laryngeal.
- 13, 14. Muscular Branches.
- 15. Deep Inferior Cardiac Branches.
- 16. Inferior Cardiac Branches.
- 17. Superior Cardiac Plexus.
- 18. Anterior Pulmonary Plexus.

19, 20. Branches Investing the Pulmonary Artery, and entering the Lungs.

21. Anastomosis with left Pneumo-

gastric Nerve.

22. Sympathetic Nerve at its place of Exit from the Carotid Canal.

23. Superior Cervical Ganglion.

24. Branches of 23. [rotid.

25. Branches to the Internal Ca-

26. Plexiform Ramifications Investing the External Carotid.

27. Branches to the External Carotid.

28. Ganglionic Enlargement.

29. Branch to Facial Nerve.

30. Branches to Temporal and Internal Maxillary Arteries.

31. Branches to Facial Artery.

32. Branches to Lingual Artery.

33. Branches to Superior Thyroid Artery.

34. External Branches of Superior Laryngeal Nerve.

35. Communicating Branches with the Superior Cardiac Plexus.

36. Superior Branch of the Cervical Cardiae.

37. Its Plexiform Origin at the Superior Cervical Ganglion.

38. Branches Passing with the Inferior Thyroid Artery, supplying the Thyroid Gland.

39. Branch to the Cardiac Plexus.

40. Superficial Cervical Nerve (Sympathetic) from the Superior to Middle Cervical Ganglion.

41. Middle Cervical Ganglion.

42. Internal Branches of the Middle Cervical Ganglion.

43. Inferior Cervical Ganglion.

44. Branches investing the Subclavian Artery.

45. Middle Cardiac Nerve

46. Communicating Branch to Recurrent Laryngeal.

47. Superior Cardiac Nerve lying on the Aorta.

47. Superficial Cardiac Plexus.

48. Branch passing to the Posterior Aspect of the Heart, and communicating with the Anterior Pulmonary Plexus.

49. Branch communicating with the Anterior Pulmonary Plexus.

50. Branch to the Left Coronary Artery. [Artery.

51. Branch to the Right Coronary

52. Inferior Cardiac Nerve.

53. Anterior Coronary Plexus.

54. Posterior Coronary Plexus (Sympathetic.)

55. Pharyngeal Branch of Pneumogastric.

56. Glosso-pharyngeus Nerve.

57. Branches to Internal Carotid Artery.

58. Communicating Branch of the Glosso-pharyngeus with the Pharyngeal Branch of the Pneumogastric.

59. Ramifications of the Glossopharyngeus at the Tonsil (Root of the Tongue).

60. Internal Laryngeal Branch of the Pneumogastric.

61. Communicating Branches with the External Laryngeus (Vago-sympathetic).

62. Muscular Branches distributed to the Constrictors.

63. Branches to the Inferior Constrictor and Thyroid Gland.

64. Communicating Branches with Recurrent Laryngeus.

65. Branches supplying the Muscles and Mucous Membrane of the Larynx.

66. Hypoglossal Nerve.

67. Its Anastomosis with the First and Second Cervical Nerves.

68. Facial Nerve.

- 69. Communicating Branch of the Facial with the Auricular Filaments of the Inferior Maxillary division of the Trigeminus.
- 70. Temporal Branch of Facial.
- 71. Branch to Digastricus (Facial).
- 72. Branch to Stylo-hyoid.
- 73. Accessory Portion of the Spinal Accessory Nerve.
- 74. Occipital Branch of the Second Cervical.
- 75. Third
- 76. Fourth Cervical Nerves.
- 77. Fifth

- 78. Sixth
- 79. Seventh | Cervical nerves.
- 80. Eighth
- 81. First Dorsal Nerve (Dorsalis Primus.)
- 82. Phrenic Nerve.
- 83. Its Superior Roots.
- 84. Its Inferior Roots.
- 85. Unusual Branches of the Third Cervical.
- 86. Supraspinatus Nerve.
- 87. Branches supplying Pectoralis Major and Serratus Magnus.
- 88. Median and Radial Nerves.

PLATES XVII AND XVIII.

- 4. Trunk of Intercostal Nerve.
- 5. Thyroid Ganglion.
- 6. Fourth Cervical Nerve.
- 7. Branch of 6 to Middle Cervical Ganglion.

- 8. Branch of the Fourth and Fifth Cervical Nerves joining 5.
- 9. 10. Two Branches from the Inferior Cervical Ganglion to 5.
- 11. Inferior Cervical Ganglion.
- 12. External Branch of 11 to Cervical Nerves.
- 13. Branch from the Last Cervical and First Dorsal Nerves to 11.
- 14. Branches of the Superior Cervical Ganglion, which form the Superior Cardiac Nerve.
- 15,16,17,18. Superior Cardiac Nerve.
- 19. Anastomosis of 18 with Superior Cervical Ganglion.
- 20. Branch of 18 to Hypoglossal Nerve.
- 21, 22. Branches of 18, which pass over the Arch of the Aorta.
- 23. Thyroid Branches of 5.
- 24. Branches of 5 to 11.
- 25. Branch from 11 to 26.
- 26. Middle Cardiac Nerve.
- 27. Branch from 5 accompanying 26.
- 28. Ganglioniform Enlargement of 26.
- 29. Branches of 26 joining the great Cardiac Plexus.
- 30. Branch from the Middle Cervical Ganglion to the Arch of the Aorta.
- 31. Deep Cardiac Plexus.
- 32. Cardiac Ganglion of Wrisberg.
- 33. Branches from 31 and 32 to Anterior Coronary Plexus.
- 34. Right Lesser Cardiac Nerve.
- 35, 36. Branches to Anterior Cardiac Plexus,
- 37. Origin of Nerves to the Anterior Coronary Plexus.
- 38. Nerves to Left Anterior Pulmonary Plexus.
- 39. Branch of 38 to Anterior Coronary Plexus.
- 40. Branch from 31 to Middle Cardiac. [diac Nerve.
- 41. Branch from 31 to Inferior Car-

- 42. Plexiform arrangement of 40 and 41.
- 43. Trunk of Branches which form the Posterior Coronary Plexus.
- 44. Branches from 38 to 43.
- 45, 46, 47, 48. Branches supplying the Pulmonary Artery and Left Side of the Heart.
- 49, 50. Branches passing to Anterior Coronary Plexus. [Artery.
- 51, 52. Branches to Left Pulmonary
- 53. Branches passing to k.
- 54. Posterior Coronary Plexus.
- 55. Branches which accompany the Posterior Coronary Artery.
- 56, 57. Branches supplying the Posterior Surface of the Heart.
- 58, 59. Nervous Filaments from 54.
- 60, 61, 62, 63. Branches accompanying the Left Branch of the Posterior Coronary Artary.
- 64, 65. Communicating Branches with Posterior Coronary Ar-
- 66. Branch of 65. [tery.
- 67. Branches from the Anterior Surface of the Heart to the Posterior Coronary Artery.
- 68. Branch to the Auricles.
- 69, 70. Branches from 31 to join with Branches of 54, passing along the Arch of the Aorta.
- 71. Left Pneumogastric Nerve.
- 72. Superficial Cardiac Branch of 71.
- 73. Communication of 72 with 18.
- 74. Branch of 71 going to 31.
- 75. Branch of 74 to Pulmonary Plexus.
- 76. Recurrent Nerve of left side.
- 77. 76 passing beneath 31.
- 78, 79. Branches of 76 distributed to the Trachea and Thyroid Gland.
- 80. Branches to Bronchi.
- 81. Branch to Pulmonary Vessels.
- 82, 83. Branches to left Pulmonary Artery and Left Lung.

- 84, 85. Branches to Anterior Surface | 89. Left Phrenic Nerve. of the Left Lung.
- 86. Branch to Left Bronchus and Esophagus.
- 87, 88. Brachial Plexus.

- 90. Right Phrenic Nerve.
- 91, 92. Branches accompanying the Transversalis Colli and Internal Mammary Arteries.

PLATES XIX AND XX.

ANTERIOR SURFACE OF THE HEART OF A HORSE.

- A. Right Ventricle.
- B. Left Ventricle.
- C. Right Auricle.
- D. Left Auricle.
- E. Pulmonary Artery.
- F. Vena Cava Superior.
- G. Aorta.
- H. Right Coronary Artery.
- I. Branches to the right Ventricle.
- K. Branches to the right Auricle.
- L. Left Coronary Artery.
- N. \ Larger Branches of Same.
- 0.
- Lesser Branches of L.
- R. Branch to Left Auricle.
- 1. Trunk of Right Cardiac Nerve.
- 2. Its Bifurcation.
- 3. Right Cardiac Branch.
- 4, 5, 6. Branches to the Right Heart.
- 7. Ganglioniform Enlargement.
- 8 to 20. Branches passing with the Anterior Coronary Artery and its Branches.
- 21 to 24. Branches to Right Auricle. 25. Left Cardiac Nerve.

- 26, 27. Branches joining the Major Branches of the Left Coronary Artery.
- 28. Anastomoses with those of the Right Cardiac Nerve.
- 29. Trunk of Left Cardiac Nerve dividing into numerous branches.
- 30. Left Cardiac Ganglion.
- 31, 32. Branches of Left Cardiac Nerve which do not enter the Left Cardiac Ganglion.
- 33. Continuation of the Branches of the Left Cardiac Nerve passing through the Left Cardiac Ganglion.
- 34 to 46. Branches of the Left Cardiac Nerve passing with the Left Coronary Artery and its Branches.
- 47. Branch of Left C. Nerves to the Lesser Branches of the Left Coronary Artery, and passing with it.
- 48. Auricular Nerves.
- 49, 50, 51, 52. Branches of the same Nerve supplying the Left Ventricle.

FIG. II. ANTERIOR SURFACE OF THE HUMAN HEART.

- A. Right Ventricle.
- B. Left Ventricle.
- C. Right Auricle.
- D. Left Auricle.
- E. Vena Cava Superior.
- F. Aorta.

- G. Pulmonary Artery.
- H. Ductus Arteriosus.
- I. Right Coronary Artery.
- K. Major Branch of Left Coronary Artery.
- L. Minor Branch of same.

N.B. The Nerves in this figure are those passing with the coronary arteries on the left side of the heart, supplying the substance of the left Ventricle. The Superficial Nerves and the rest are the same in the human heart as in that of the horse.

PLATES XXI AND XXII.

FIG. I. POSTERIOR SURFACE OF THE HEART OF A HORSE.

- A. Left Ventricle.
- B. Right Ventricle.
- C. Left Auricle.
- D. Right Auricle.
- E. Vena Cava Inferior.
- F. Coronary Sinus.
- G. Middle Cardiac Vein.
- H. Right Coronary Artery.
- I. Branches to the Right Ventricle.
- K. Branches to the Left Ventricle.
- L. Branch to Right Auricle.
- M. Branch of the Right Coronary Artery dividing into N and O Branches.
- N. To the base of the Left Ventricle.
- O. Branch to Left Auricle.
- P. Branch of Left Coronary Artery.
- 1, 2, 3, 4, 5. Trunk and Branches of the Posterior Cardiac Nerve.
- 6, 7. Nervous Plexus around the Orifice of the Inferior Vena Cava.

- 8. 9. Branch of Posterior Cardiac Nerve to the Left Auricle and Ventricle.
- 10, 11, 12, 13, 14, 15, 16. Branches of the same to the Left Ventricle.
- 17 to 24. Branches of same, accompanying those of the Right Coronary Artery to the Left Ventricle.
- 25 to 35. Branches of the above Nerve passing with the Branches of the Right Coronary Artery to the Right Ventricle.
- 36, 37, 38. Branches from the convex surface of the Right Ventricle.
- 39 40, 41. Branches of the same Nerve distributed to the right Auricle.

FIG. II. POSTERIOR SURFACE OF THE HUMAN HEART.

- A. Left Ventriele.
- B. Right Ventricle.
- C. Vena Cava Superior.
- D. Vena Cava Inferior.

- E. Middle Cardiac Vein.
- F. Vena Azygos Sinister.
- G. H. Pulmonary Veins.

PLATES XXIII AND XXIV.

PLATE LVII.

FIGS. I, II. SPINAL CORD.

The spinal canal opened from behind, and the membranes, vessels, nerves, etc., removed to expose the spinal marrow. It shows the termination of the cord in the canda equina, and the nerves passing through the intervertebral foramina. The regions here shown are the sacral, lumbar, and a portion of the dorsal.

FIGS. III, IV. SPINAL CORD OF A CHILD.

In these figures the whole of the cord is exposed.

From 1 to 8 are the roots (posterior aspect) of the Cervical Nerves.

From 8 to 20, those of the Dorsal Nerves.

From 20 to 25, those of the Lumbar Nerves.

From 25 to 30, the Sacral.

The numbers on the right side of the figures designate the Vertebræ, where they have been divided.

From 1 to 7, the Cervical Vertebræ.

From 1 to 12, the Dorsal Vertebræ.

From 1 to 5, the Lumbar Vertebræ.

From 1 to 5, the Sacral Vertebræ—the Coxcyx not being numbered.

FIGS. V, VI. SIDE VIEW OF SPINAL NERVE TRUNKS.

The numbers designate the Nerve Trunks after the junction of their anterior and posterior roots beyond the Spinal Ganglia.

It indicates that there are on each side, 8 Cervical, 12 Dorsal, 5 Lumbar, 5 Sacral, and 1 Coxeygeal Nerves. In all thirty-one. Their number does not correspond to the number of Vertebræ.

At the first Cervical, and at the Coxeygeal, Impair Ganglia are marked. The Coxygeal Nerve is also placed in a line with the Spinal Cord.

EMBRYOLOGY.

EMBRYOLOGY.

PLATE I.

FIG. I. THE HUMAN EMBRYRO HERE REPRESENTED IS ONE DESCRIBED BY BLUMENBACH, AND IS SUPPOSED TO BE ABOUT THREE WEEKS' OLD, (SOMEWHAT MAGNIFIED).

The germinal vesicle is laid open and the rudimentary embryo exposed. The vescicle is partly removed from, and partly adherent to, the fœtal chorion, which shows very numerous filiform and imbranched villi. For the size of the ovum, the external surface of the chorion, is altogether constituted of proportionately very large and intricate villi. These are not spread over the whole chorion, but cover about one-half of its surface. Some of these filaments are connected together by means of small vesicles or nodules, very much resembling small hydatids. The villi themselves, supplied with numerous branchlets, seem to belong partly to the chorion, partly to the uterine mucous membrane. This diminutive embryo, which was hardened in alcohol, appeared as a solid and opaque mass, even before its hardening, and was attached to the internal surface of the ovule by a very short and slender thread. Examined under a microscope, it showed already the beginning of the formation of the head, which was altogether out of proportion to the size of the trunk, which formed a curve in such a manner that the lower part of the body reached the head. The upper and lower extremities appeared on the trunk, in the shape of very small tubercles. The coccygeal extremity was coiled up towards the trunk.

FIG. II. A HUMAN EMBRYRO ABOUT FIVE WEEKS' OLD, DESCRIBED BY LEUCKHART.

The four visceral arches are formed, and the orbital process in front has already reached up to the fourth arch. The rudimentary upper extremities are larger than the lower. Between the lower extremities can be seen the embryonic caudal primitive vertebræ. The embryo still adheres to the internal surface of the ovule by an umbilical cord. The body of this embryo has already reached the size of its head. Neither eyes nor mouth were to be seen; only rudimentary spots in the places of existence of these organs could be discovered. The spinal vertebræ were distinctly visible, and the upper and lower extremities were somewhat

farther developed. The body, like the above figure, was bent upon itself, the coccygeal extremity nearly touching the head. The Vitteline vescicle was connected with the body by a slender pedunele, situated between the amnion and the chorion. The membranes, the innermost of which was opened, resembled those of the previous figure.

FIG. III. AN EMBRYO OF ABOUT SIX WEEKS' GROWTH.

The body of this embryo was well hardened in alcohol, and distinctly showed the upper and lower extremities. Here the body was larger than the head. The dorsal vertebræ were distinctly visible. The eyes were plainly to be seen, and the buccal opening very distinct. No rudimentary nose. The upper and lower extremities were somewhat larger than in the former. The thorax was broader than in the former two, it likely being a male embryo. The umbilical cord was larger and thicker.

FIG. IV. AN EMBRYO OF ABOUT SEVEN WEEKS, OBTAINED WITH ALL ITS MEMBRANES UNOPENED.

It shows an increase of its own size and that of the umbilical cord. The villi of the chorion were far more simple, as well as shorter, and not so numerous as in the former three. The embryo was still curved, yet not to the extent of the former specimens. The body was considerably larger than the head, and both eyes were distinguished as very dark spots. The oral slit was plainly marked, and slight depressions above it indicated the place of the nose. In the upper extremities, the arm and forearm could be plainly distinguished. The lower extremities were smaller and more rudimentary than the upper. The coccygeal tuberosity was very prominent. The umbilical cord longer, yet more slender.

FIG. V. AN EMBRYO OF ABOUT EIGHT WEEKS, CONTAINED IN A SAC; RATHER LARGER THAN USUAL.

It surpasses the former specimen both in size and development. The ovular membranes are increased in thickness; the flocculi of the deciduary membrane are similar to those described in Fig. 2. The curved embryonic body is semi-circular. The head is less increased in size than the trunk, the cranial portion being the most developed. The eyes are very distinct, the mouth open, and small foramina indicate the place for the nose. The ears are indicated by very small pores. The spinal column is broad and thick. The chest is tolerably broad. The abdomen protrudes around the navel, from which emerges a lengthy but slender cord. In the upper extremities the upper, forearm and hand are readily discernible. The fingers are not quite developed. In the lower extremities, which extend below the coccygeal tuberosity, the thighs, legs, and feet are also discernible. The toes are not at all developed. Between the umbilicus

and the coccygeal tuberosity two foramina are seen, which seem to indicate the female sex of the embryo.

FIG. VI. AN OVUM CONTAINING A HUMAN FŒTUS A LITTLE OVER FIVE MONTHS' OLD, WHICH WAS ACCIDENTALLY EXPELLED FROM THE UTERUS IN AN UNBROKEN STATE.

The fœtus is very readily seen through the pellucid membrane. The figure represents that part of the surface of the ovum which it occupied in the womb, that is, its left and anterior position. The flocculi of the chorion, which are not only more abundant, but longer, are seen in the left and upper portion, at the place occupied by the placenta, as very readily seen in the next figure. That portion of the membrane occupied by the placenta was so thick, that the embryonal portion of the placenta could not be examined through it. From the outer placentary edges to the middle of the ovum, the membranes became comparatively thinner than in an ovum of the second or third month.

FIG. VII. SAME AS FIG. VI.

The two outer membranes opened, exposing the internal or feetal surface of the placenta, and leaving the feetus still enclosed in the amnion. The placental vessels are seen as radiating from a common centre. The arteries are more slender, but more tortuous, than the veins, which are straight and of greater diameter. The arteries are far more divided up into branches than the veins. Here also the gradual thinning of the external membrane from the periphery of the placenta is readily noticed.

FIG. VIII. THE FŒTUS FREED FROM ITS SACS AND LEFT IN THE POSITION IT OCCUPIED IN THEM.

The umbilical cord slightly stretched and the placenta placed in such a position as to expose its entire internal surface. The fœtus is also drawn in such a manner on the plate as to correspond to Figs. 6 and 7. This fœtus is that of a female, as can be readily distinguished by its face. There are some few short hairs on its scalp; the forehead is wrinkled and the eyelids are distinct; its eyes and mouth firmly closed. Its external ear, though somewhat different from that of a mature fœtus, is sufficiently developed to show all its parts. The lower extremities by far exceed in size the upper. The umbilical cord is drawn here as not inserted into the middle of the placenta, but to one side.

FIG. IX. SAME AS FIG. V, ONLY A PORTION OF THE CHORION IS REMOVED,

TO SHOW THE MIDDLE MEMBRANE. THE MIDDLE AND INTERNAL

MEMBRANES ARE INTACT.

PLATE II.

FIGS. I, II, III, IV AND V. MAGNIFIED VIEWS OF FIGS. I, II, III AND IV OF PLATE I.

FIG. VI. SOMEWHAT MAGNIFIED EMBRYRO CORRESPONDING TO FIG. V,
PLATE I.

FIG. VII. FEMALE EMBRYO OF ABOUT NINE WEEKS (ENLARGED).

It shows an increased size beyond the former figures. The face shows plainly its different parts. The nose somewhat projects; the external ear showing the rudiments of the concha. The thorax is somewhat broader than in the former. The lower limbs project beyond the trunk; the upper limbs not only show the upper, forearm and hand, but its digits may be readily distinguished. The lower extremities show thigh, leg, foot, and toes. The coecygeal tuberosity still exists. The umbilical cord is longer and more slender.

FIG. VIII. A TEN WEEKS' OLD EMBRYO (ENLARGED).

The most of the parts of the face are plainly discernible. The eyes, nose, and external ear are far more developed. The chest is broader; the upper and lower limbs project far beyond the trunk. The coccygeal tuberosity has disappeared.

FIG. IX. AN ELEVEN WEEKS' OLD FEMALE EMBRYO.

All the characteristics of the sex are plainly visible on it. Its face shows each part distinctly. The eyelids are closed. The mouth also closed by its lips. The nostrils become somewhat prominent. The external ear very plain. The upper and lower extremities completely developed.

FIG. X. AN EMBRYO OF THREE MONTHS.

On the head, the frontal, parietal, and temporal bones are plainly discernible, the eyeballs protrude beyond the level of the face and are closed in by both lids. The nose completely formed; both lips distinct; nearly every part of the external ear formed. The neck is plainly separated from the head and scapula. Its large chest plainly indicates it to be a male. The single ribs are plainly distinguishable. The coccygeal tuberosity completely disappeared. The penis is prominent, the scrotum small and empty. The form of both scapulæ are distinctly visible. In the upper arm the deltoid and biceps muscle are prominent. The anconeus and external condyles of the humerus are plainly visible. In the hand, both carpus and metacarpus, as well as the digital articulations, are well marked. In the inferior part of the trunk—the ossa innominata—

on the femur, the trochanter major and the condyles, also the gluteus maximus, the vasti, and the ham string muscles are plainly discernible. In the legs the patella, the tibia, and the malleoli, and in the feet all the parts are fully developed.

FIG. XI. FEMALE EMBRYO OF THREE AND ONE-HALF MONTHS.

The forehead is prominent; eyes, nose, mouth, and ears have distinctly increased in size. The chest is that of a female. The clitoris is surrounded by the preputial fold; the vaginal orifice is separate from the anal.

FIG. XII. MALE FŒTUS OF THREE AND A HALF MONTHS.

FIG. XIII. FEMALE FŒTUS OF FOUR MONTHS.

FIG. XIV. MALE FŒTUS OF FOUR MONTHS.

FIG. XV. MALE FŒTUS OF FOUR MONTHS (HIGHLY DEVELOPED).

The body is fully developed, being a fine specimen of the male fœtus of that age. The muscular development, the breadth of its thorax distinctly show its male character.

FIG. XVI. A FEMALE FŒTUS OF FOUR MONTHS.

The round form of the head is very regular; forehead broad and round; eyes large, the eyelids well formed; nose well shapen; mouth half open; lips delicate; chin slender; ears rather larger than in the previous figures. The neck corresponds with the well-formed head. The thorax shows it to be a female fœtus. The shoulders are prominent, arm well rounded, hand and fingers slender. The lower extremities by far surpass the upper. The thighs are more curved than in a male fœtus of a corresponding age.
